

# Instructions

Frontend Machine Test

**Technology Used:** Angular 7 is must for complete work. (Ref: <https://angular.io/>.)

**What To Do?** You need to design a page for Blockchain site with reference of given attachment. You can use assets and take the help of given PNG/PSD.

**Page should have functionalities described below:**

1. Page should be responsive.
2. After cursor on Header, tabs color should change and an underline should come below that option.
3. Service tab in header should open a dropdown when we click on that dropdown. That dropdown should contain all the service name, which is defined in 'Our Services' section.
4. In Our Services block when cursor is moved from any of the service 'onmouseover' event should occur for that (Size should zoom-in for that service with Animation).
5. When we click on 'View All Service' button, then popup should open with all Service name. (Service name should have bullets)
6. In Trends section slider should work from left to right direction.
7. In Contact Us section, all fields are required and should have the following validations:
  - Your Name: Should accept letters. Min: 3, Max:32 characters. ○ Your Email Address: Basic email validation should be there. ○ Company: Should not accept special characters.
  - Your Subject: Maximum: 15 characters.
  - Your Message: Min: 30, Max: 150 characters.
  - Submit Button: 'Submit' button should be disabled if any field remains blank. If all fields meets validation, alert message should be displayed when 'Submit' button is clicked. Alert message will be "Contact form has been submitted successfully."
8. In footer when user bring cursor on any of Social Icon, that icon colour should change. (Only icons will be used in footer)
